

fly the

VAMPIRE

How would you like to hear, feel and fly a massive piece of aviation heritage? How about experiencing yourself what a first generation jet warbird is all about first hand? Getting flight instruction on one of the very first aircrafts in history to be powered by a jet engine, is something you don't come across every day.

As part of our efforts to make the journey from the UK to demonstrate the vampire at an airshow in Austrian skies, the Dehavilland Vampire T11 likes you to come and fly onboard with us. For the first time in Austria.

Take your seat and buckle up.

The flying days for Austrian aeroclub members will take place on dates still to be determined between 28.08 and 04.09.24 at Graz airport. Training flights on the Vampire, which is a heavy drinker of jetfuel are offered in Austria for €3,300 for a 25 minutes flight. But for fellow pilots who are members of an aeroclub we are offering this unique opportunity for €2,800 only. Minimum age 18, must be in good health and fluent in English. These flying days are pending that enough people register themselves for a flight in the coming 10 days, so we can confirm our participation at an airshow we're in talks with and can make the trip to Graz.

To register send your details including mobile number to: info@priorityairshows.com as well an email copy to your local aeroclub coordinator. Questions? +31620448455
